The Impact of Technology on the Environment

Part A:

Visit the site: http://www.digitalresponsibility.org/environmental-and-societal-impact-of-technology

Read the six linked articles.

Response:

Summarize which issue is personally the most important to you, include a summary of the problem and a possible solution or at least some steps in the right direction. Aim for your response to be about one paragraph. Post this response to our classroom forum.

Part B:

Goal: investigate and report on governmental and community initiatives that encourage environmental stewardship and promote programs and practices that support sustainability (e.g., local community recycling centres, private companies that refurbish computers, printer cartridge recycling programs).

Specific Instructions: Choose ONE governmental or community (must be local!) initiative that supports sustainability. Summarize, in paragraph form, the goal of the program and what the program does. Include a link to the initiative's website. Post this response to our classroom forum.
